Principal: Mrs Joanne Maw

7th August 2018

We heard about Edval from the North East Learning Trust which is near to us. The reports I received from contacts there was positive, so we decided to move our timetabling software to Edval in May 2018.

I had not done timetabling before, so had much to learn. I found the training to be good quality, and the application very easy to use. Surprisingly, I found the entire timetable including rooming could be done same day, which was never previously the case.

I was able to deliver better timetables to our staff much earlier than usual. I have found Edval to be a powerful tool which has helped us to schedule our school with ease. The timetable quality has been improved when compared to previous years; there are fewer split classes and rooming is better.

The level of support and responsiveness from Edval has been excellent; this has included training days, school visits, e-mail and telephone calls. I am happy to recommend Edval to others and welcome contact from other schools who may want to ask questions about our experience.

Daniel Suddick
Leader of Attendance, Data, Reporting and Timetable
